VIRGINIA BEACH CITY PUBLIC SCHOOLS

MIDDLE SCHOOL

# Report Card

ISSUED 2005-2006

Dear Parents or Guardian:

We are pleased to provide you with the eighth annual School Report Card containing important information about your child's school. This report card is an important part of educational accountability designed to help you assess many aspects of your child's school and evaluate its success over time.

In addition to school and staff characteristics for the current school year and student performance for previous years, you will find information related to the school's progress toward meeting state and federal standards. I am pleased to indicate that for the current year, 100 percent of our schools earned full state accreditation.

Schools are also expected to make Adequate Yearly Progress (AYP) based on criteria required by the *No Child Left Behind (NCLB) Act of 2001*. A school's AYP status is based on Standards of Learning (SOL) test results and other factors such as attendance rates for elementary and middle schools and graduation rates for high schools. Criteria for meeting AYP are set for all students and for subgroups of students, including economically disadvantaged, limited English proficient, and students with disabilities, as well as for major racial and ethnic groups. Each student subgroup within a school must achieve all of the annual objectives for the school to be classified as making AYP. We are proud that 95 percent of our schools made AYP for the 2005-2006 school year based on 2004-2005 data.

However, our ability to remain "ahead of the curve" and show continuous improvement depends on our students, teachers, staff, community, and family members like you. We hope that you will continue to help us succeed through your commitment to your child's education and by taking an active role at your child's school.

Sincerely,

Sheila S. Magula, Ed.D.  
Superintendent

STUDENT PERFORMANCE MEASURES

The Standards of Learning (SOL) tests are state mandated achievement tests used by students to earn verified credits for graduation and by schools and the division to assess student achievement and plan for continuous improvement. The test results are also used to determine school accreditation and AYP status. The 2004-2005 SOL performance shown in the following tables includes all SOL unadjusted scores for the year including scores reported back to the home school for alternative center students. The bar graphs show three-year trends for spring SOL scores for the school, division, and state. Remediation recovery, SELP scores, retake test scores, substitute test scores, and alternate assessment scores are not included in the SOL Performance tables. Retake test scores are included in the bar charts. School and division scores exclude SECEP students.
