PSYI.2.4 Describe the structure and function of the major regions of the brain.
PSYI.2.5 Identify the methods used to analyze brain activity.
PSYI.2.6 Explain the function of the right and left hemispheres.
PSYI.2.7 Describe the parts and function of the endocrine system.
PSYI.2.8 Assess the effects of heredity and environment on human behavior.

Unit 3: Sensation and Perception

PSYI.3.1 Explain the concepts of threshold, adaptation and constancy.
PSYI.3.2 Describe the operation of sensory systems.
PSYI.3.3 Identify examples of principles of perception.
PSYI.3.4 Identify factors that influence sensation and perception.
PSYI.3.5 Assess controversies related to sensation and perception.

Unit 4: Learning

PSYI.4.1 Describe the origins, principles and applications of classical conditioning.
PSYI.4.2 Describe the origins, principles and applications of operant conditioning.
PSYI.4.3 Describe the origins, principles and applications of observational learning.

Unit 5: Thinking and Language

PSYI.5.1 Describe the process of encoding.
PSYI.5.2 Describe the three types of information storage.
PSYI.5.3 Describe the process of retrieval.
PSYI.5.4 Describe unusual types of memory.
PSYI.5.5 Describe causes of forgetting and methods to improve memory.
Unit 6: Memory

PSYI.6.1 Explain and give examples of the components of thinking.
PSYI.6.2 Describe methods of problem solving.
PSYI.6.3 Analyze obstacles that inhibit problem-solving.
PSYI.6.4 Identify the basic elements of language.
PSYI.6.5 Describe factors affecting language acquisition.

Unit 7: States of Consciousness

PSYI.7.1 Describe the physiological and psychological functions of sleep.
PSYI.7.2 Describe the stages of sleep.
PSYI.7.3 Describe sleep disorders.
PSYI.7.4 Describe artificial variations of consciousness.

Unit 8: Developing Child

PSYI.8.1 Assess the effect of maternal behavior on pre-natal development.
PSYI.8.2 Describe the process of physical development.
PSYI.8.3 Describe the process of social development.
PSYI.8.4 Describe the process of cognitive development.
PSYI.8.5 Describe the process moral development.

CITIZENSHIP GOALS

- Accepting responsibility for completing assignments and tasks
- Valuing the worth and dignity of all individuals
- Appreciating individual differences
- Respecting the rights, property, beliefs and opinions of others
- Resolving conflicts with mutual respect and reason
- Accepting the rights and responsibilities of citizenship
- Developing a positive self-image
- Understanding the behavior of self and others
- Accepting responsibility for their behavior and its consequences

SKILLS

- **Study Skills**
  - Taking organized and useful notes from lectures, discussions and varied sources of information
  - Using varied and diverse sources of information

- **Chart/Graph Skills**
  - Drawing inferences from charts, graphs, tables and maps
  - Using charts, graphs, tables and maps to organize, display and depict data

- **Problem-Solving/Decision-Making Skills**
  - Using the problem-solving approach to find a possible solution to a psychological problem
  - Stating hypotheses, analyzing and interpreting data, drawing conclusions

- **Critical Thinking Skills**
  - Recognizing stated and unstated assumptions on which an argument is based
  - Determining the validity of assumptions
- Evaluating conflicting sources of information

- **Communication Skills**
  - Preparing oral and written reports, projects and presentations
  - Listening actively to the ideas and thoughts of others
  - Contributing ideas and thoughts to class discussion
  - Communicating research findings in both written and oral forms
